5 L

User manual

1. Wash the horse with water so that the coat is moist / wet, apply shampoo and ensure that it is well distributed in the coat.
2. Let the product work for approx. 10 min. before washing out the product.
3. Comb the horse so that pests are removed, repeat treatment as needed and degree of pest.

Areas of application

Animalia: Horse

Removes: Fleas, larvae and eggs. (is suitable for flea eczema)

Environment: REMEMBER, treating the animal is only half the solution...

With the product *Animalia Equidae Environment* you can treat / disinfect surfaces that come into contact with the horse.

NOTE

- Avoid eyes and ears.
- Do not allow the horse to ingest the product orally.
- (Avoid licking the product / fur during the working time)
- Remember to wash the product COMPLETELY so that there is no residue in the coat.
- Remember to give the product an effect time.
- In case of spillage, it may in rare cases leave marks on untreated surfaces / floors, like all other liquids that are not pure (lime-free) water H₂O.

Durability: RTU (Ready To Use) approx. 3 years from production date (See date marking)
